Prompt for Visuals

Prompt: A hyper-detailed, high-speed macro shot capturing a violent yet graceful collision of mango textures. A tidal wave of viscous, glossy mango nectar intertwines with jagged, velvety cubes of ripe fruit. The frame is a monochromatic explosion of vivid saffron and deep orange. Millions of microscopic, backlit nectar droplets are suspended in mid-air, refracting golden light like liquid amber. Lighting is cinematic and directional, emphasizing the pulpy, fibrous grain of the fruit and the surface tension of the juice. Rendered in 8K with extreme clarity, no horizon line, and a seamless, saturated orange void background.

Prompt for Antigravity
